

# MPLS NETWORKING SOLUTIONS

*A smart solution for your critical business needs*

Windstream's Multi Protocol Label Switching (MPLS) Networking provides managed solutions that extend communications across multiple business locations. This product enables users to prioritize voice or data through Quality of Service (QoS) levels, based on their unique business requirements. MPLS Networking is a private, secure solution built across the Windstream core MPLS advanced IP network.

## FEATURES

### FLEXIBLE ROUTING OPTIONS

- VLS: Maintain control over your own routing and IP addressing plans.
- VPN: Let Windstream manage everything for you.

### QUALITY OF SERVICE OPTIONS TO MEET YOUR BUSINESS NEEDS

- Real Time QoS: This preferred voice networking solution delivers premium QoS to your site, allowing you to maintain your own VoIP network.
- Business Critical QoS: This preferred data networking solution (which is ideal for video conferencing) provides priority treatment to data packets over Internet traffic.
- Standard Data QoS: A best effort data networking solution, enabling you to share data and Internet applications across all locations.

## BENEFITS

- Performance: Maximize network performance by dynamically allocating bandwidth among voice, networking and Internet/data applications.
- Flexibility: Adjust traffic patterns when your business needs change.
- Any-to-Any Connectivity: Allows regional sites to exchange data without consuming unnecessary bandwidth at the hub due to a "fully meshed network".
- Compatibility: Works with all industry standard VoIP protocols and applications.
